

## Week 1 Module – C & C++ Programming

### Topics to be Covered

Students are required to Submit handwritten notes and practice for the following topics in **C and C++ Programming Language**:

1. **Syntax**
2. **Conditions and Loops**
3. **Programming Problems**
  - Solve the given **Star Pattern Questions**

#### 1. Square

```
*****
*****
*****
*****
*****
```

#### 2. Hollow Square

```
*****
*   *

## Week-1 Module

### [1] ⇒ C Syntax and basic Structure.

C is a procedural and structured programming language. Every standard C program has a precise, structured layout.

- Header Files (`#include <stdio.h>`) ⇒ It's a pre-processor directive that includes the standard I/O library, giving access to `printf()` and `scanf()`.
- Main Function (`int main()`) ⇒ It's the mandatory entry point of a C program. Execution starts at `{` and ends at `return 0;`.
- Output Function (`printf`) ⇒ It's used to display output. It supports format specifiers and escape sequences like `\n`.
- Semicolon (`;`) ⇒ Semicolon terminates every statement in C.

### [2] ⇒ Conditions and Loops

- Conditional Statements (`if-else`) ⇒ It runs the `if` block if the condition is true, otherwise runs the optional `else` block.
- Loops (`for loop`) ⇒ It repeats code a fixed number of times using initialization, condition and increment/decrement.

- Date: \_\_\_\_\_
- Nested Loops  $\Rightarrow$  They're needed for 2D patterns.  
One loop has to be inside another.
  - Outer Loop  $\Rightarrow$  It manages the rows  
(vertical progression).
  - Inner Loop  $\Rightarrow$  It handles the columns  
(prints spaces or stars horizontally  
for the current row).

### 3 Programming Problems

Q → Solve the given star pattern Questions

1- Square

Output :

```
* * * *
* * * *
* * * *
* * * *
* * * *
```

```
#include <stdio.h>
int main() {
    int n = 5; // Total rows and columns
    // Outer loop for rows
    for (int i = 1; i <= n; i++) {
        // Inner loop for columns
        for (int j = 1; j <= n; j++) {
            printf(" * ");
        }
        printf("\n"); // Move to the next line
    }
    return 0;
}
```

C Main.c × +

```
1  #include <stdio.h>
2  int main() {
3      int n = 5;
4      for (int i = 1; i <= n; i++) {
5          for (int j = 1; j <= n; j++) {
6              printf("*");
7          }
8          printf("\n");
9      }
10     return 0;
11 }
```

## 2- Hollow Square Pattern

Output :

```
* * * * *
*           *
*           *
*           *
* * * * *
```

```
#include <stdio.h>
```

```
int main () {
```

```
    int n = 5;
```

```
    for (int i = 1; i <= n; i++) {
```

```
        for (int j = 1; j <= n; j++) {
```

```
            // Print star only at the boundaries
```

```
            if (i == 1 || i == n || j == 1 || j == n) {
```

```
                printf ("*");
```

```
            } else {
```

```
                printf (" "); // Print empty space inside
```

```
            }
```

```
        }
```

```
        printf ("\n");
```

```
    }
```

```
    return 0;
```

```
}
```

C Main.c

```
1  #include <stdio.h>
2  int main() {
3      int n = 5;
4      for (int i = 1; i <= n; i++) {
5          for (int j = 1; j <= n; j++) {
6              if (i == 1 || i == n || j == 1 || j == n) {
7                  printf("*");
8              } else {
9                  printf(" ");
10             }
11         }
12         printf("\n");
13     }
14     return 0;
15 }
```
